

Prior compliance list of aircraft operators specifying the administering Member State for each aircraft

The Commission must publish a list of aircraft operators which on or after 1 January 2006 performed an aviation activity listed in Annex I of Directive 2003/87/EC that specifies the administering Member State for each aircraft operator ("the list").

The Commission updated the list of [aircraft](#) operators on 2nd February 2011.

It is important to stress that the inclusion in the EU emissions trading scheme (EU ETS) is linked to the performance of an aviation activity and is not subject to inclusion on the list. That means that aircraft operators that perform an aviation activity listed in Annex I to Directive 2003/87/EC are covered by the EU ETS whether or not they are on the list of aircraft operators at the time of the activity. Likewise operators which cease performing an aviation activity are excluded from the scheme once they cease to perform an aviation activity listed in Directive 2003/87/EC and not at the point they are removed from the list.

On the other hand, the list is legally binding regarding the determination of the administering Member State made in the list. It ensures that each operator knows which Member State it will be regulated by. It also ensures that Member States are clear on which operators they should regulate.

Due to a number of reasons, and especially because a number of aircraft operators use services of management companies, some of those operators have not been identified before the latest update of the official list of aircraft operators. European Commission invited such operators to submit their fleet list by 15 March 2011.

This prior compliance list includes the aircraft operators that:

- Submitted to European Commission their fleet lists from December 2010 to 15 March 2011;
- Became new entrants to the EU ETS in December 2010, but were not included in the official list published on 2 February 2011;
- Will become participants of aviation in EU ETS when the system will be extended to Iceland and Norway (after the Directive 2008/101/EC will be incorporated in EEA Decision). These are the operators that in this list are allocated for administration to one of EEA countries.

Most of the aircraft operators, included in this list have performed at least one flight covered by EU ETS in 2010, therefore they need to fulfil their obligations of reporting CO₂ emissions to their administering Member States. These operators should also be eligible to apply for the free aviation allowances if they monitored their tonne-km data during 2010. It is recommended that aircraft operators which have performed aviation activities in 2010 and are included in this prior compliance list contact their administering Member State as soon as possible.

Aircraft operators on the prior compliance list should be included in the list of aircraft operators, adopted by Commission Regulation, during the next update.
