

## **Prior compliance list of aircraft operators specifying the administering Member State for each aircraft - May 2012**

Inclusion in the prior compliance list allows operators to know which Member State will most likely be their administering MS in a close future so they can get in contact with the competent authority of that MS to discuss the requirements and the next steps. Operators included in the prior compliance list get included in the list of operators during the next update.

Due to a number of reasons, and especially because a number of aircraft operators use services of management companies, some of those operators have not been identified in the latest update of the EEA- wide list of aircraft operators adopted on 3 February 2012.

The present version of the prior compliance list includes those aircraft operators, which have submitted their fleet lists between 9 December 2011 and March 2012.

It also preliminary informs aircraft operators on the way they may be affected by Croatia accession to the EU i.e Croatia will become their administrative MS to Croatia in relation to their aviation activities carried out through 2014
