

On 21 Dec 2011, Universal® received the following message from Spain's Observatorio de la Sostenibilidad en Aviación (OBSA):

Spain recognizes EU Carbon Registry Account requirements

The European Commission has recently adopted new rules for the inscription in the Single European registry.

<http://eur-lex.europa.eu/JOHtml.do?uri=OJ%3AL%3A2011%3A315%3ASOM%3AES%3AHTML>

This registry will start in 2 phases:

- On the 30th of January there will be a partial activation (the allocation will occur by the end of February)
- Full activation will not take place before June 2012

For the moment, the Competent Authority, the Ministry of Environment has not established the procedure or the calendar for opening the accounts. As soon as it is determined, the Ministry will send a communication to the aircraft operators giving instructions on how to proceed.
